PROJECTS

San Diego Javascript Community App

Cross platform mobile app for SDJS members to track, RSVP to, and check in to meetup events in San Diego, browse SDJS merchandise, donate via Patreon, and subscribe to email and SMS updates.

Built using React Native and Loopback backend serving MongoDB. End-to-end and unit tests using Appium and Jest.

Origin Portal

Web platform connecting Origin Code Academy grads with potential employers looking for specific focuses or skills. Allows users to sign up and login as student or employer, maintain a profile, and allows employers to search and filter students based on role and skillset.

Built using React, React-Redux, React-Router, Bootstrap, Loopback, and MongoDB.

SMUSHR

Json parsing tool that scans target folder and subfolders for .json files, and combines discrete data points from matching keys into an array under the same key in a single file.

Built using React and Node.js.
